## Your Guards online

The smartest online guard tour monitoring system

Powerful guard tour solutions  
for security companies

[www.qrpatrol.com](http://www.qrpatrol.com)

QR-Patrol system is available in 18 languages

# Core Features

QR-Patrol is a real-time guard tour monitoring system designed especially to improve security companies efficiency and enhance guard tour management. It consists of 4 innovative applications:

QR-Patrol mobile app | QR-Patrol Web app | QR-Patrol M.A.R.S. | QR-PTT app

## Send Incident Reports

Scan NFC/QR code tags or detect beacons in specific checkpoints of the guarded area and send real-time updates of your patrol. QR-Patrol utilizes cloud technology and enables workflow management in an efficient and paperless way by automating all internal work process.

## Create Schedules & Reports

A web based application is used to manage clients, guards, territories, incidents and checkpoints. Monitor patrols in real-time by gathering multimedia data (image, voice, notes), adding signature fields and sending SOS alerts to the Monitoring Center in order to take immediate action.

## Mobile Guard Tour Management

QR-Patrol M.A.R.S. is a mobile version of the QR-Patrol application and is developed so as to facilitate guard tour administrators to take absolute control over guard tours and ensure assets protection while being on the road. You can now have real-time alerts for any new incident report.

## Push to Talk Notifications

Integrated with QR-Patrol system, QR-PTT is an easy to use PTT over IP client application developed for Lone Workers communication and co-workers interaction. QR-PTT improves efficiency by reducing communication costs and minimizing deteriorations.

# QR-Patrol

Clients in 74 countries worldwide

## 3 play technology

QR-Patrol is a pioneering guard tour system which incorporates 3 types of checkpoints: QR-code, NFC tags and Beacons.

### QR-CODE

Place QR-code checkpoints at specific positions on assets and buildings. The guard will scan QR-code tag via QR-Patrol mobile app and an immediate alert will be sent.

### NFC

Just launch QR-Patrol app and place your smartphone over the NFC tag. NFC is a perfect source of convenience and an extra arm in daily guard tour accomplishment and management.

### BEACON

Beacons are a smart way to transmit data over a short distance absolutely wirelessly. QR-Patrol is the **only guard tour system worldwide** incorporating advanced beacon technology!

Prepare and Prevent.

Don't Repair and

Repent

SECURITY

Managing to achieve the aim of a well-known and high-value online security system, we treasure the relationship built with our partners and customers. We are driven by their needs and desire for excellency in provision of their services to their own clients.

**Let get your security level to top!**

## •• SCAN

QR-codes/NFC tags/  
Beacon compatibility

## •• TEST

Check connectivity,  
position status by  
sending a test event

## •• REPORT

Send incident report  
(broken door, etc)

## MME ••

Send image, text  
and voice

## SOS ••

Send SOS alerts - take  
immediate action

## PATROL

Start-End a patrol tour
