

QR-Patrol by Terracom

Real-Time Patrol Management

The challenges

- *“Are my guards up to their duties?”*
- *“Are incidents reported timely so they are handled before they become major issues?”*
 - *“Are all personnel safe?”*
- *“How do I transform patrol data to meaningful information?”*

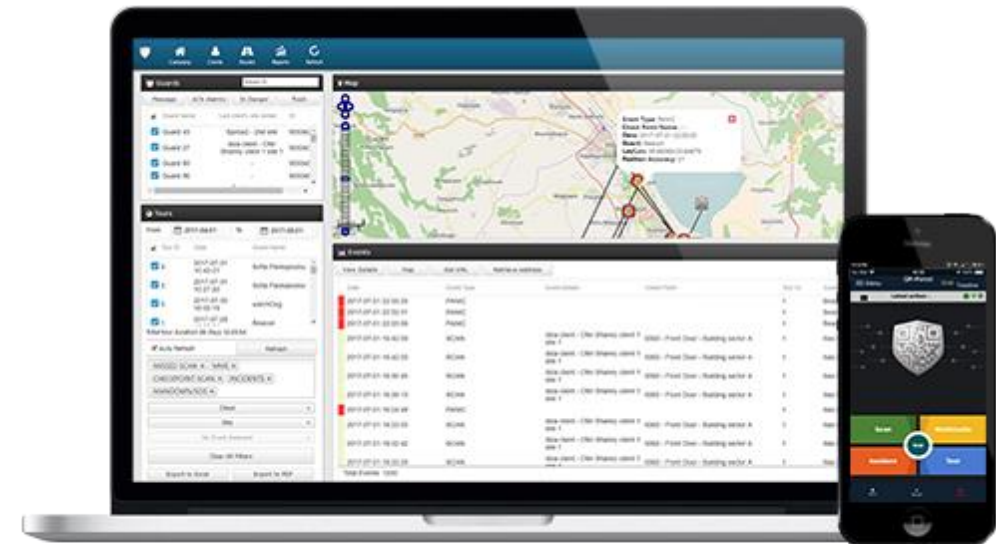

What is Quick Response Patrol

“A Software as a Service (SaaS) Workforce Management System”

- Real time information
- Remote management anywhere/anytime
- Easy to deploy & Use
- No proprietary equipment needed

Main scope:

- Proof of presence & Task completion
- Incident Management
- Safety of personnel and assets
- Data Analysis / Advanced Reporting

Operational Benefits

- ✓ Reduced Response Times - Risk mitigation
- ✓ Objective officer proof of presence – Accountability
- ✓ Automation of Workflows - Significant time savings
- ✓ Elimination of paper reports – Improved auditing process
- ✓ Incident management & Quick escalation of critical situations

Operational Benefits

- ✓ Increased compliance with Health & Safety regulations
- ✓ Integration with existing platforms via API
- ✓ Advanced inspection capabilities via Forms
- ✓ Applicable not only to Security, but also to Facilities Management, Cleaning and more

System Components

2 main applications:

- The Web application used by the Managers
- The Mobile application used by the Workers

4 Checkpoint Types:

- QR-Codes
- NFC tags
- Beacons
- Virtual (location-based)

QR-Patrol - key features

✓ Flexible Patrol Scheduling

A fully customizable scheduler enables Users to create patrol routines in advance so everyone is aware of the pending tasks. Deviations from schedule are reported in real-time.

✓ Mobile Forms

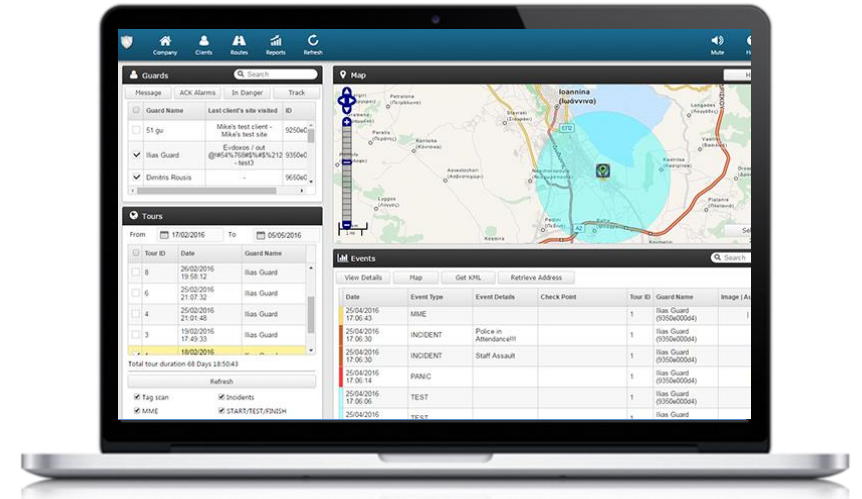

Replace exhaustive paper reports! Gather quality data from guards at certain points of importance and/or provide valuable instructions to them by attaching a Form at specific checkpoints.

✓ Advanced Reporting

Turn data into meaningful information with built-in or custom reports

✓ Scheduled Email Reports

Automate the reporting process towards your stakeholders. Customize the frequency to suit your particular needs.

QR-Patrol – key features

Indoor location

Use beacon technology to overcome physical restrictions (areas with no GPS coverage) and accurately locate guards with precision better than GPS!

Custom maps upload

Upload your custom maps (floorplans) and view your Guards actions on the Events Browser on top of your personal maps layers

Work offline

In case there is no internet connection, all data are stored locally within the mobile app and will be submitted with the correct information (timestamp, Guard position at the time of the event creation etc) once internet connection is restored

API

Minimize complexity via integration.
Connect QR-Patrol to 3rd party systems and create synergies.

QR-Patrol – key features

Instant communication

Ability to send in-app messages to your Guard(s) to raise awareness

Timeline

Timeline tab: Instantly overview what's done and what needs to be done (view all scans recently performed/ to be performed according to your schedules)

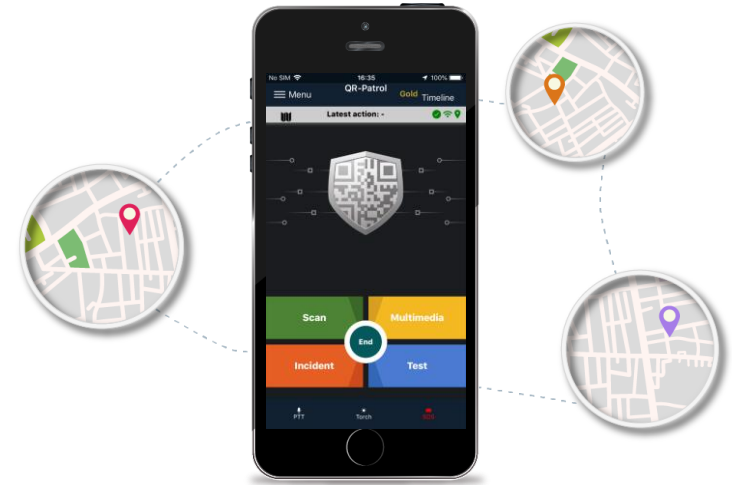

Geofencing

Be informed of whether a checkpoint is scanned by the Guard within its pre-defined area or not, so QR Codes cannot be copied.

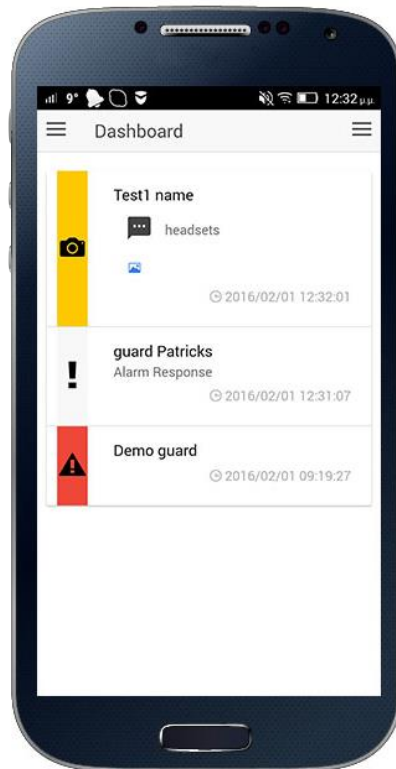

Tracking

Get informed of a Guard's position without them needing to scan any tags/checkpoints

QR-Patrol Additional Mobile Apps

QR-Patrol M.A.R.S. is a mobile application for the monitoring center/managers, which allows them to have access to the system and **monitor the guards even when being out of office/ on the road**. Like the cloud-based application, it can also be used by the end clients!

QR-PTT, i.e. "Push To Talk" over IP, is an Android/iOS based app that helps guards and lone workers communicate instantly (orally or via text messages) with each other. **A modern walkie talkie!**

Clientele

Trusted by more that 1200 organizations in 89 countries

Heathrow

Extraversion, Innovation and Awards

Our approach and growth has been recognized at a national and international level with multiple Awards
